NOTICE OF INTENT

Facility Location/Owner: Ford Motor Company - Rouge Office Building
3001 Miller Road
Dearborn, Michigan 48121

Facility Description: The Rouge Office Building houses general administrative offices for several operational components of the Ford Motor Company, and Rouge Steel Company. The facility was constructed in 1955 and currently contains a total of 366,000 sq. ft.

Renovation Work Description: Renovation is planned for the Heating, Ventilating and Air Conditioning (HVAC) system in the Rouge Office Building requiring removal of asbestos containing materials in concentrations of 25 to 40% from approximately 550 linear feet of pressurized steam line. Renovation work requiring asbestos removal is expected to commence on October 25, and be completed by November 14, 1988.

Asbestos Removal Procedures: Removal of pipe covering containing asbestos will be accomplished using an isolated section procedure. Asbestos removed from the pipe sections will be wetted and placed in properly marked asbestos disposal bags. The areas immediately adjacent and beneath the targeted removal sections will be plastic sheeted for containment. Immediate work area will be wet vacuumed subsequent to completion of removal work.

Monitoring: Clean air monitoring will be conducted at the removal sites prior to commencement of the removal work, personal sampling will be conducted during removal operations, and work place sampling will be performed after completion of the job. All exposure monitoring will be completed in accordance with OSHA Standard 29 CFR 1926.58.

Disposal: Asbestos contained materials removed during this renovation work will be disposed of at the Wayne Disposal Inc. site in VanBuren Township.
